PROFESSIONAL SUMMARY

Dedicated Computer Science Engineering student with strong foundations in **Python, SQL, C/C++, and programming fundamentals**. Skilled in **problem-solving, Object-Oriented Programming (OOP), data structures, debugging, and software development concepts**. Hands-on experience in developing **Python-based analytical and forecasting applications** using **Python, Power BI, and SQL**. Passionate about building **scalable software solutions** and eager to contribute as a **Software Intern** in a collaborative engineering environment.

TECHNICAL SKILLS

Programming: Python, C, C++, SQL

Data Analysis: Pandas, NumPy, Excel

Visualization: Power BI (**Power Query, DAX, Power BI Service**), Matplotlib, Seaborn

Tools: Jupyter Notebook, VS Code, GitHub

Core Concepts: Object-Oriented Programming (OOP), Data Structures, Problem Solving, DBMS

INTERNSHIP EXPERIENCE

Data Analytics Intern

[GitHub](#)

Infosys Springboard 6.0 | August 2025 – October 2025 | Remote

- Analyzed **88,000+ climate records** using **Python (Pandas)** to identify weather trends and anomalies.
- Performed **data preprocessing and exploratory data analysis (EDA)** using Python (Pandas).
- Designed **4+ interactive Power BI dashboards** to visualize temperature and rainfall variability.
- Applied **problem-solving and analytical skills** to generate actionable insights, improving efficiency by **30%**.

PROJECT EXPERIENCE

COVID-19 Trend Analysis and Forecasting using Python

[GitHub](#)

- Processed and analyzed **50,000+ COVID-19 records** using **Python** for time-series analysis.
- Applied **Facebook Prophet** model to forecast trends, achieving **87% short-term prediction accuracy**.
- Developed **interactive dashboards** to visualize infection growth and trend patterns.
- Derived **actionable data-driven insights** to support forecasting and decision-making.

Walmart Sales Analytics & Demand Forecasting using Python

- Performed **exploratory data analysis (EDA)** on weekly sales data to identify trends and demand patterns.
- Analyzed impact of **economic and seasonal factors** (CPI, fuel price, holidays) on sales performance.
- Cleaned and transformed data using **Python (Pandas, NumPy)** for accurate analysis.
- Built **forecasting models** to predict future sales and support inventory planning.

CERTIFICATIONS

- Python Essentials 1 & 2 – Cisco Networking Academy
- Microsoft SQL Certification – Intellipaat
- Deloitte Data Analytics Job Simulation – 2025
- TCS iON Career Edge – Young Professional – 2025
- Professional Certificate Program in AI & Data Science – IIT Indore (In Progress)

EDUCATION

Bachelor of Technology in Computer Science Engineering
MVGR College of Engineering
CGPA: 8.49 / 10

April 2027
Vizianagaram, AP
